**RELIABLE PROTECTION
AND HIGH PERFORMANCE
UP TO 1600 A**

The new DPX³ 125 HP, 160 HP and 250 HP MCCBs extend the advantages of the DPX³ range from 16 A to 1600 A. Not only do DPX³ HP MCCBs provide reliable, accurate protection, they also offer numerous benefits for your low voltage distribution boards.

The wide choice of characteristics and versions meets the requirements of all types of installation.

The new configurable electronic protection units as well as the different selectivity techniques available help ensure optimum continuity of service. The high limitation capacity in the event of short-circuits ensures a longer service life for your installation. Operation and maintenance are made easy by the comprehensive range of electrical and mechanical auxiliaries. Perfect synergy with Legrand XL³ and XL³ S enclosures simplifies implementation.

Numerous accessories are available to enable adaptation to any board configuration.

High-performance circuit breakers for your projects

2

These products are reliable and rugged, easy to use and install, and provide effective protection for your installation. There is a choice of four sizes, available with 3 and 4 poles, in fixed or draw-out versions and with a choice of thermal-magnetic or electronic protection depending on the desired service level. This offer also includes a range of control and signalling units and connection accessories for easy integration in any electrical installation, regardless of configuration.

PROTECTION:

- THERMAL-MAGNETIC OR
- ELECTRONIC (FOR DPX³ 250 HP, DPX³ 630 AND 1600)

With DPX³ 125 HP, 160 HP and 250 HP, which have been added to the DPX³ 630 and 1600 MCCBs and isolating switches, Legrand offers a solution ideally suited to the performance requirements of all your installations for current ratings from 16 A to 1600 A and breaking capacities up to 100 kA.

- A LONGER SERVICE LIFE
FOR YOUR INSTALLATIONS

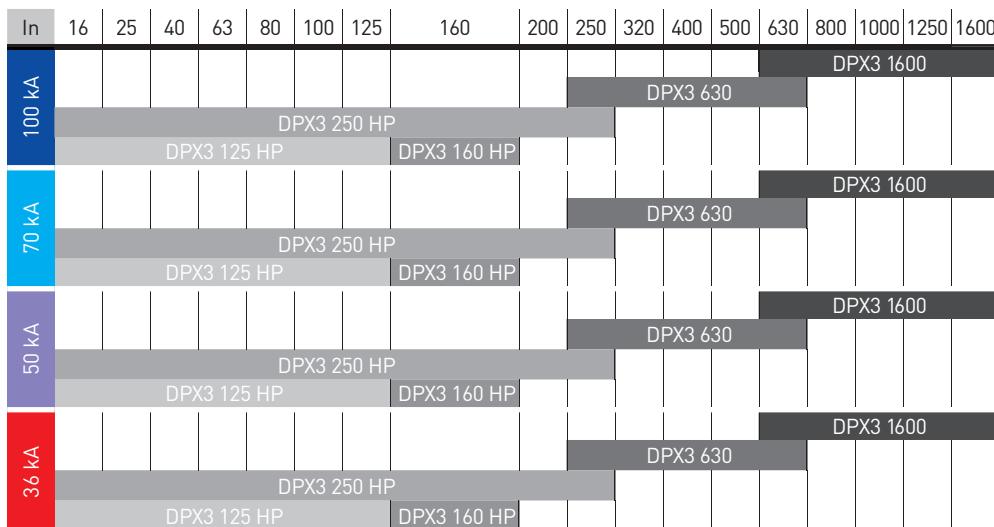

The “Active breaking capacity” patented system integrated in the new 70 kA and 100 kA DPX³ HP MCCBs significantly reduces the current magnitude and dissipated energy in the event of short-circuits, thus increasing the limitation capacity of devices. Improved limitation capacity means less overheating in the cables, fewer mechanical effects, less electromagnetic disturbance, and therefore a longer service life for your installation over time.

VERY HIGH PERFORMANCE LEVEL

SIZES AVAILABLE

Four circuit breaker sizes available with breaking capacities from 36 to 100 kA over the whole range, which makes them suitable for all types of site in the large service sector and industry.

EASY IDENTIFICATION

Easy identification of the breaking capacity thanks to the colour-coded marking on the front of the equipment:

Different versions for all types of installation

4

The DPX³ range offers a wide choice of versions to meet all types of requirement depending on the site.

- Thermal-magnetic, electronic or magnetic-only protection
- With or without integrated residual current protection
- With or without integrated measurement function
- Fixed, plug-in or draw-out version

MAGNETIC-ONLY CIRCUIT BREAKERS

Magnetic-only circuit breakers, available throughout the range from 6.3 A to 1000 A, are particularly suitable for protecting three-phase motors. Thanks to their high limitation capacity, the new DPX³ 125 and 250 HP, combined with CTX³ contactors, can provide type 2 coordination (according to IEC 60947-4-1), and thus provide better continuity of service.

TRIP-FREE SWITCHES

The 4 device sizes are also produced in a DPX³-I 125, 160, 250 HP and DPX³-I 630 and 1600 trip-free switch version for installations that only require on-load breaking and separation of circuits. All the control and signalling units and connection accessories are common to those of the corresponding circuit breakers.

OPTIMISED INTEGRATION

The dimensions of 4P DPX³ 125 HP, 160 HP or 250 HP circuit breakers with or without integrated residual current protection are exactly the same (within the same family), which saves a significant amount of space in enclosures and gives the ability to upgrade the installation from a standard version to a version with integrated residual current protection without changing the wiring or fixing plates.

Electronic protection configurable to your requirements

6

Electronic DPX³ circuit breakers equipped with S10 protection units are fully configurable. They can be used to adapt settings as closely as possible to the requirements of your installation, either by enabling/disabling the different protection devices (tripping time delays and currents), or by altering the different trip thresholds. The tripping curve is therefore fully customised to suit the real-life conditions of each project.

INTERNAL BATTERY

Thanks to the internal battery, the protection unit can be set even if the circuit breaker is de-energised. Tests and troubleshooting can be done directly via the circuit breaker LCD screens.

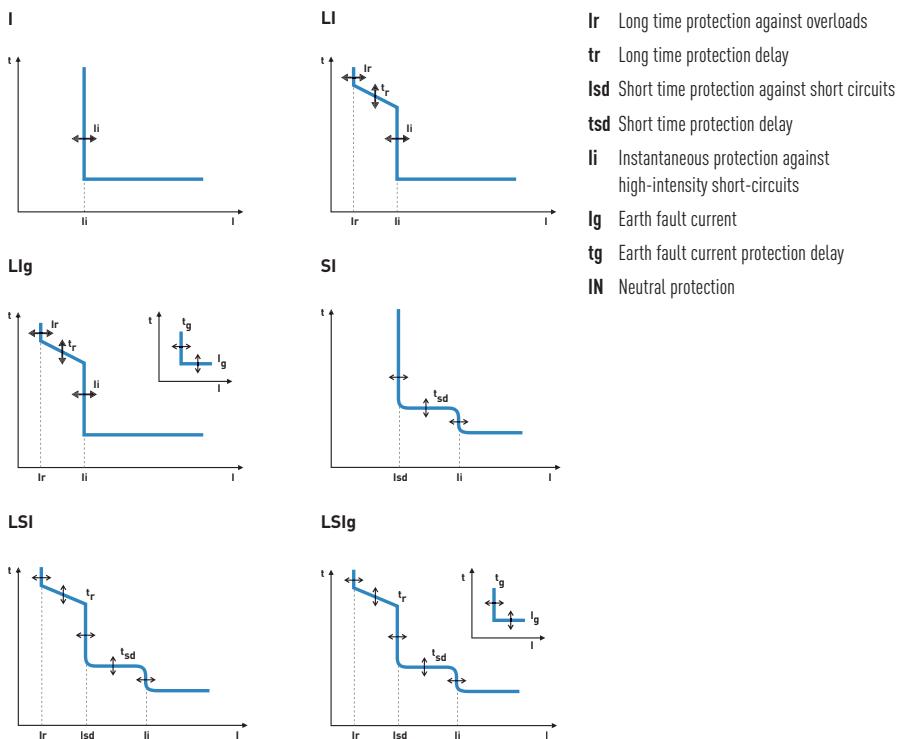

TWO OPTIONS FOR CONFIGURING SETTINGS

Locally on the circuit breaker or on a PC, smartphone or tablet.

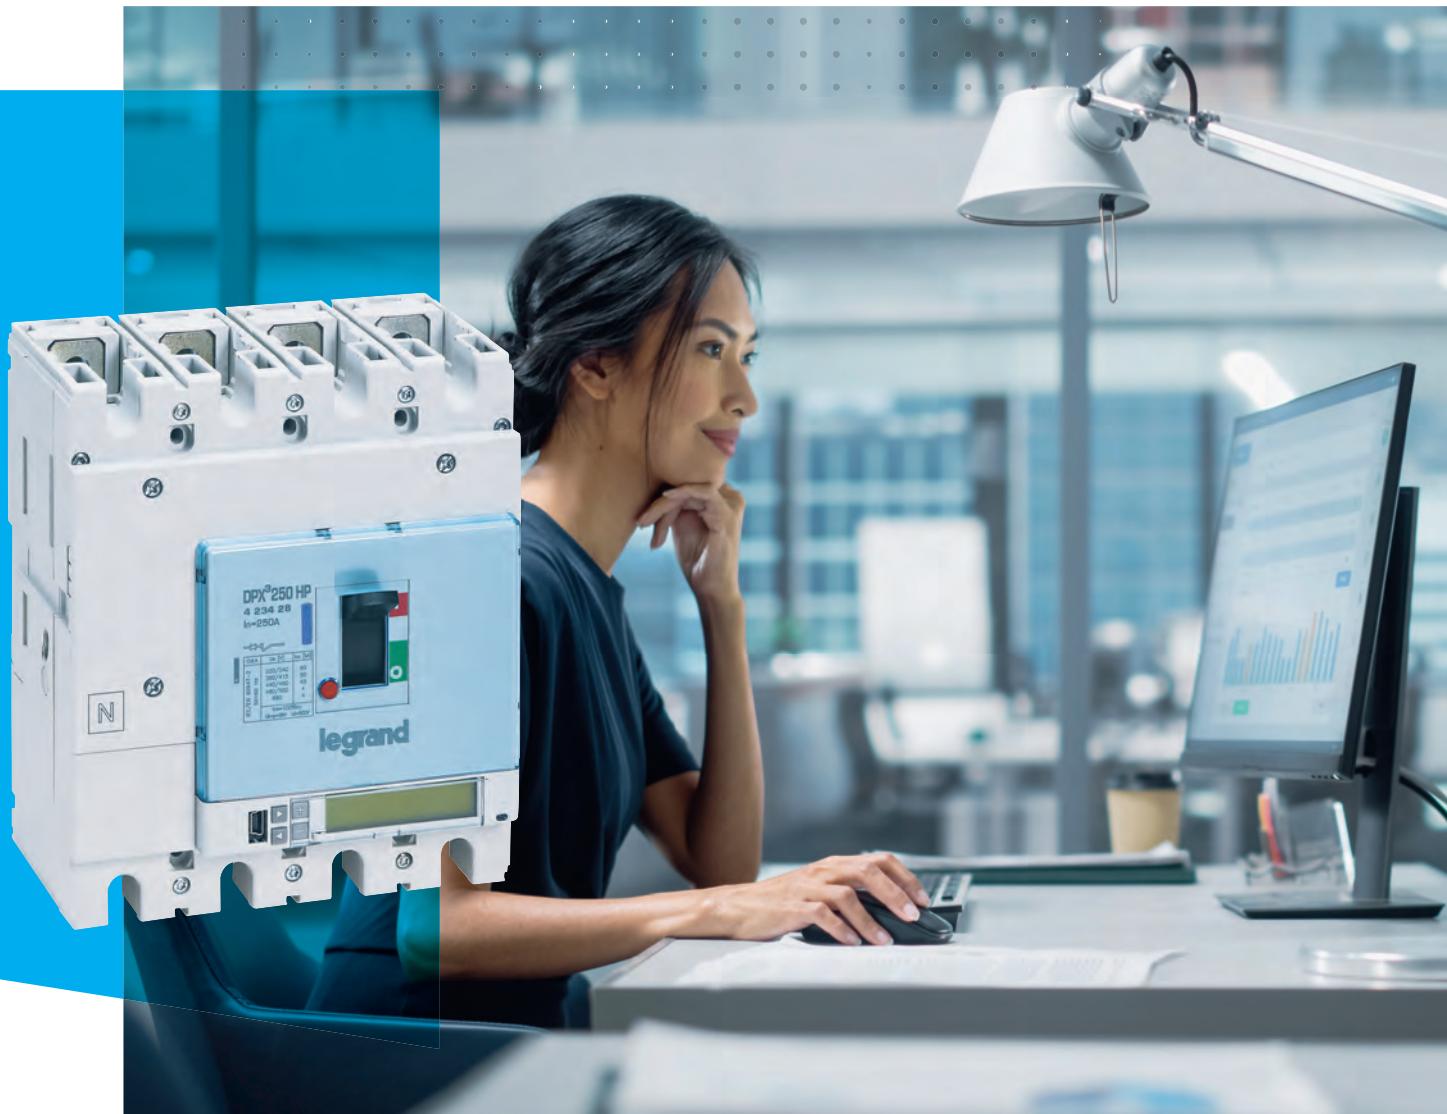

CUSTOMISABLE SETTINGS

A single circuit breaker can operate according to different tripping curves depending on the settings.

CONFIGURING SETTINGS VIA THE SOFTWARE OR THE APPS

There are several ways to configure the various settings: directly on the protection units (using the +/- and >/< buttons on the front face), on a PC with Power Control Station software installed, or on a tablet or smartphone via the EnerUp+ Project app.

Power Control Station software for PC and the EnerUp+ Project app for smartphone/tablet can be used to exchange data with the DPX³ S10 protection unit.

The software and app can be used to:

- monitor the status of the circuit breaker
- display information (firmware and device versions, alarms, measurements, parameters, fault log, settings)
- configure the different protection devices^[1]
- update the protection unit firmware^[2]
- generate reports based on the data stored and read by the protection unit^[1]
- run diagnostic tests

- upload data linked to your profile and installation to the Cloud (with the EnerUp + Project app only)

Integrated measurement and optimum continuity of service

10

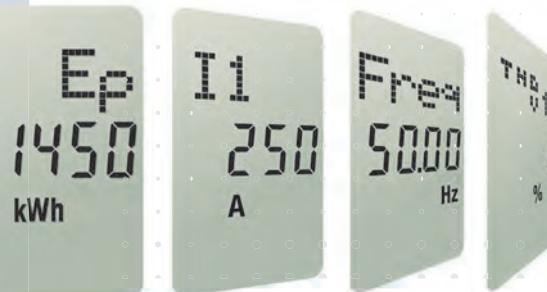

With electronic DPX³ 250 HP, 630 and 1600 S10 with integrated measurement, it is very easy to monitor the parameters and consumption of the different circuits in the installation.

FUNCTIONS TO MAKE USE EASIER

Electronic DPX³ circuit breakers equipped with S10 protection units with integrated measurement can be used to display the current, voltage, active and reactive power, frequency and power factor values, as well as the energy consumption. Alarms can be programmed on some parameters, including minimum and maximum voltage, phase unbalance, and minimum and maximum frequency.

- The measured values are displayed directly on the LCD screen on the front of the equipment.
- The measurement data can also be displayed on a PC equipped with Power Control Station software or remotely on a smartphone or tablet via the EnerUp+ Project app.

Currents, voltages, frequency, power, energy, THD.
Integrated measurement is available on the DPX³ 250 HP, 630 and 1600 MCCBs.

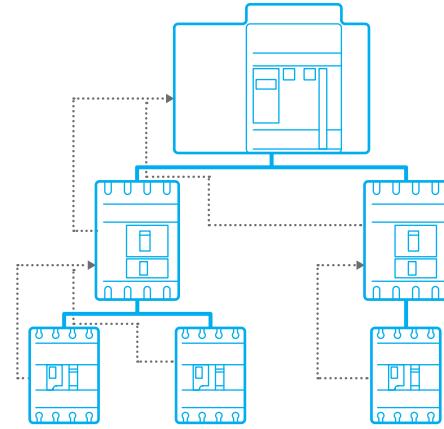

Guaranteeing continuity of service, selectivity between Legrand circuit breakers is optimal thanks to the improved performance of DPX³ devices.

In critical configurations, the dynamic selectivity and logical selectivity offered by the protection units in electronic DPX³ circuit breakers provide total continuity of service in any situation.

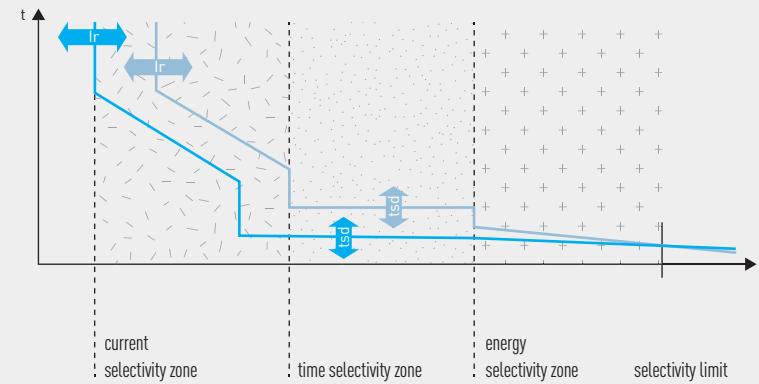

LOGICAL SELECTIVITY

This is "smart" selectivity obtained via communication between electronic DPX³ (and/or DMX³) circuit breakers interconnected by an external wired connection. It can be used to obtain total selectivity on several levels and reduce the thermal and electrodynamic stresses on the cables or the bars, thus optimising the installation.

CURRENT SELECTIVITY AND TIME SELECTIVITY

The accurate settings of electronic DPX³ MCCBs ensures optimum current and time selectivity.

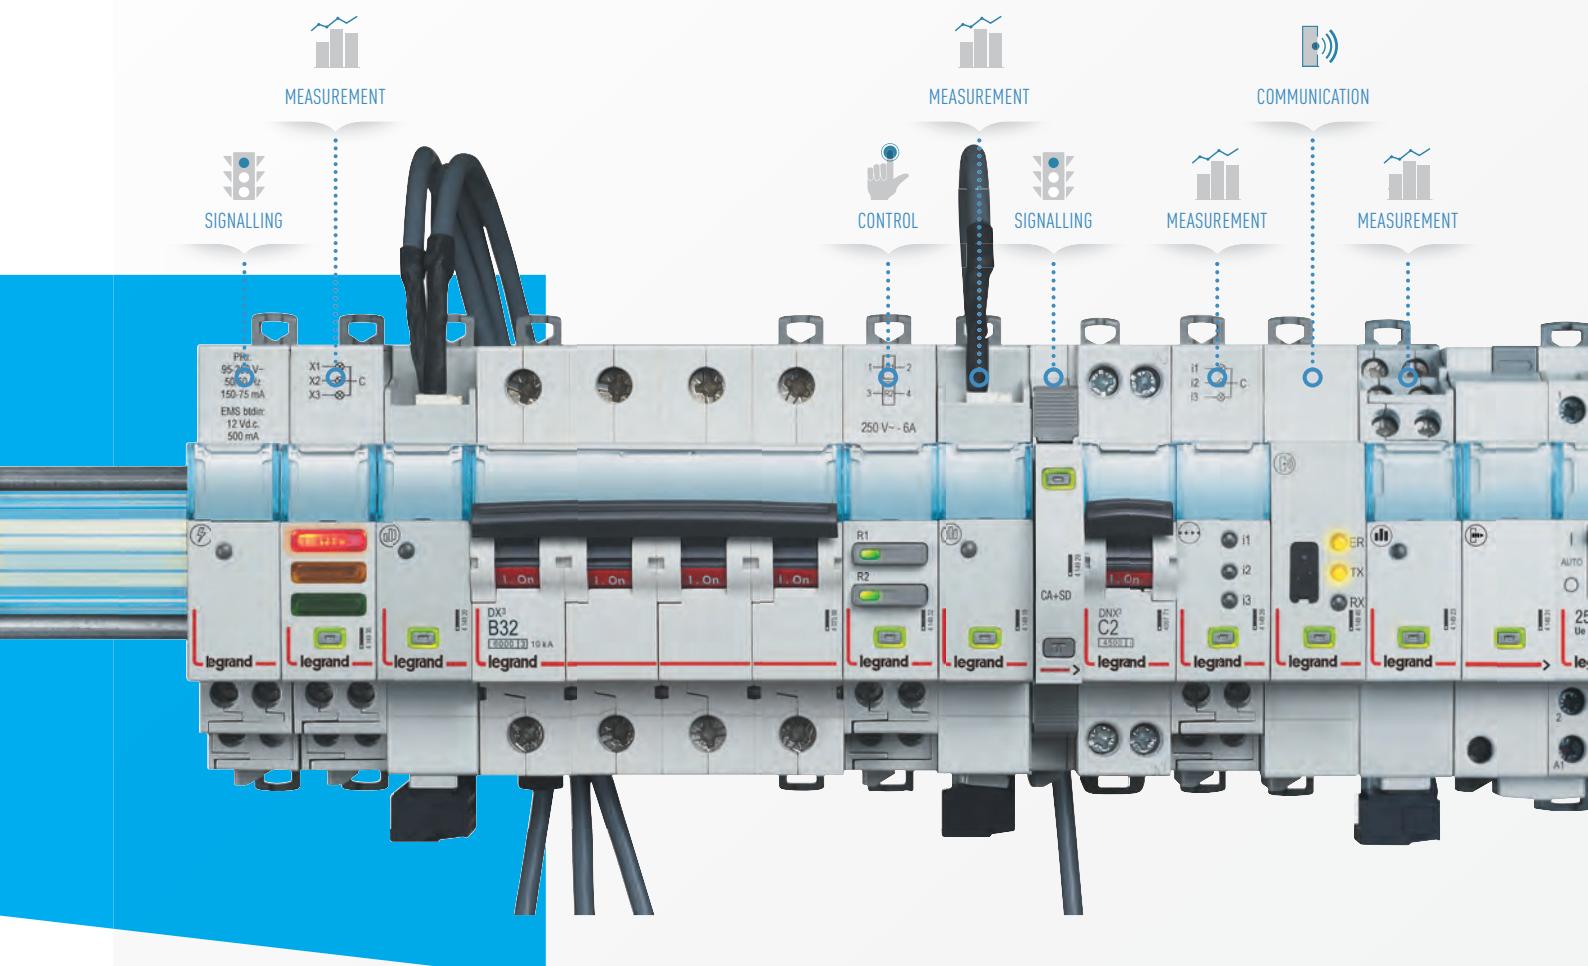

CX³ EMS, a universal, innovative system for energy management

12

The CX³ EMS energy management system is used to supervise and manage a building's energy consumption, ensuring reliability and continuity of service, for optimum installation efficiency. It offers the option of viewing, measuring and controlling the

installation remotely and/or locally. Thanks to the innovative automatic connection process, this autonomous and fully integrated system simplifies mounting and does not require changes to the existing distribution boards wiring.

The CX³ EMS system consists of modules to be mounted on a DIN rail. There is no minimum number of modules and it can also be used to perform very basic supervision tasks. Thanks to its scalability, new functions can be added at any time to suit the needs of the installation.

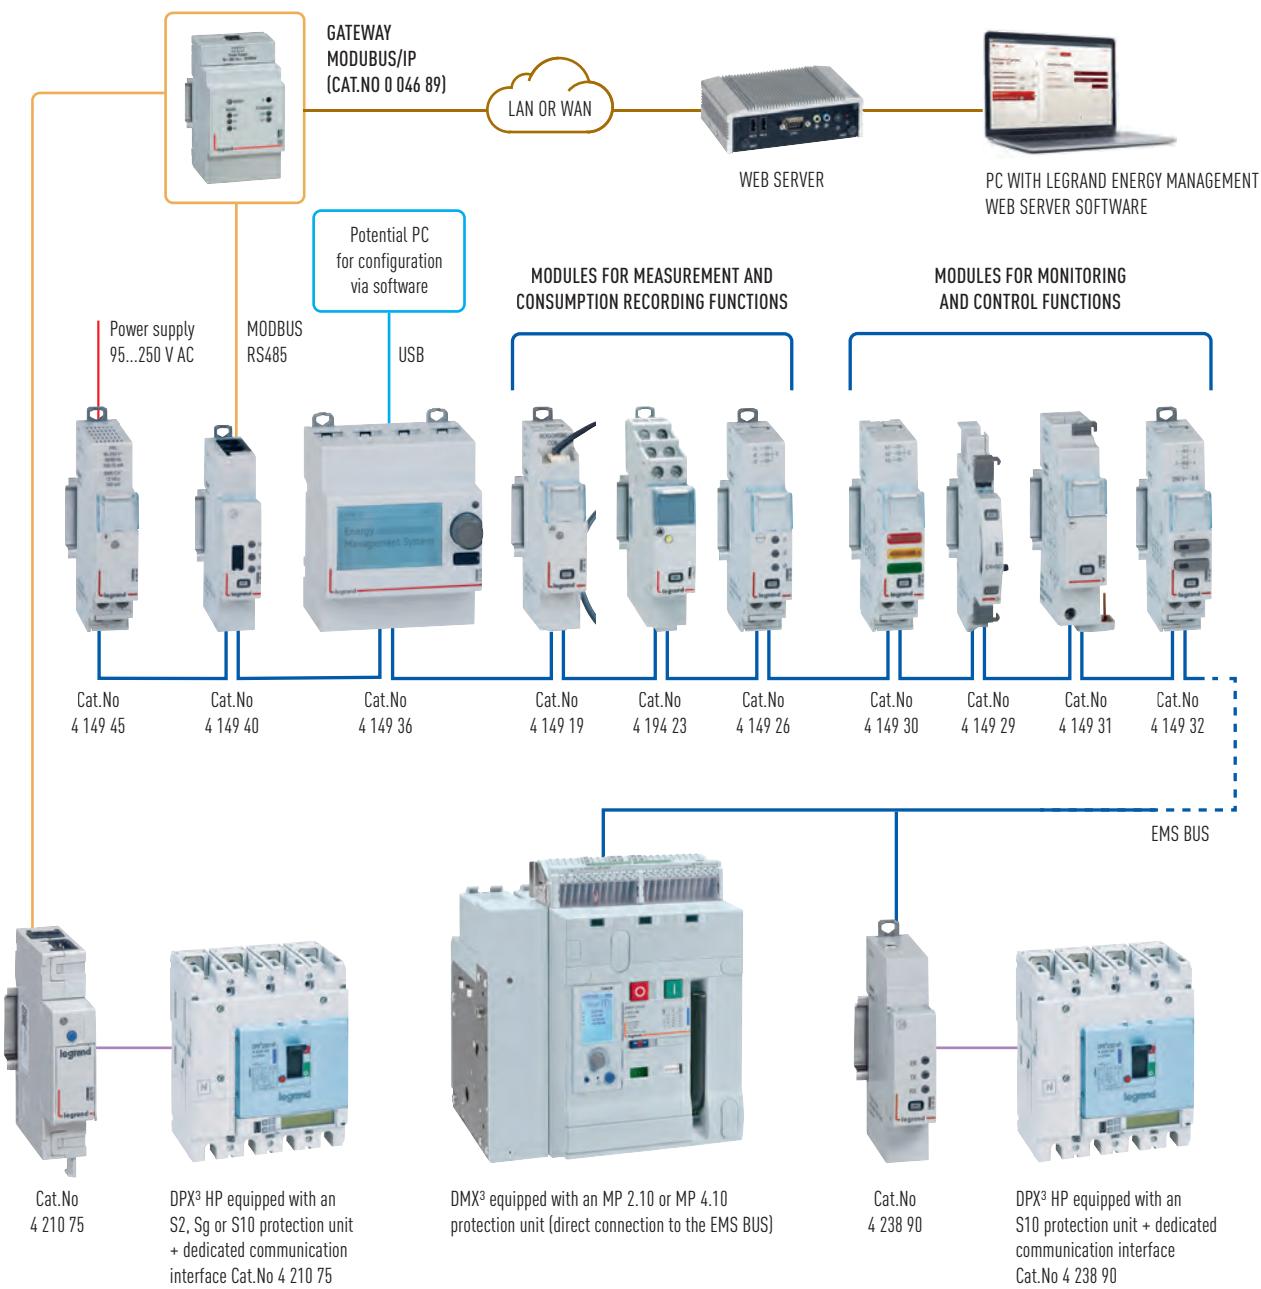

SCHEMATIC DIAGRAM

CX³ EMS modules are compatible with all Legrand protection devices, from the simple DIN rail mounting circuit breaker, to DPX³ MCCBs or DMX³ ACBs.

For DPX³ and DMX³ devices equipped with protection units with integrated measurement, the measured values are automatically fed back to the Legrand Energy Management Web Server software.

Control and signalling auxiliaries that are easy to install and wire up

14

SAFETY, SIMPLICITY
AND SPEED OF
INSTALLATION

To provide emergency breaking, automatic or remote control, and feedback on the status of the device, all the DPX³ circuit breakers can very easily be fitted with a comprehensive range of electrical auxiliaries.

Supply inversion and motor operators from 16 to 1600 A

16

The interlocking device for DPX³ HP greatly simplifies the installation of a supply inverter: It consists of a plate and a mechanical interlocking device.

SAFETY, SIMPLICITY
AND SPEED OF
INSTALLATION

The mechanical interlocking device is fitted between two DPX³ HP circuit breakers of the same size. It is also available in a version with an electronic module.

DPX³ HP - FIXED VERSION

The circuit breakers and interlocking device are fixed to the plate with just a few screws.

DPX³ HP - PLUG-IN AND DRAW-OUT VERSION

For supply inverters consisting of DPX³ HP circuit breakers in a plug-in or draw-out version, the plate is fitted with an interlocking device located on the back.

MOTOR OPERATORS

Motor operators for DPX³ HP 250, DPX³ 630 and 1600 are available in a front version.
They take different supply voltages from 24 to 230 V, both DC and AC.

Connection accessories for multiple configurations

18

Connection plates, cage terminals, spreader strips, rear terminals, etc.

DPX³ 125, 160, 250 HP and DPX³ 630 and 1600 have all the accessories needed for upstream and downstream connection using cables or bars in a multitude of configurations.

CAGE TERMINALS

High-capacity cage terminals can be used for connection with large cross-section copper or aluminium cables.

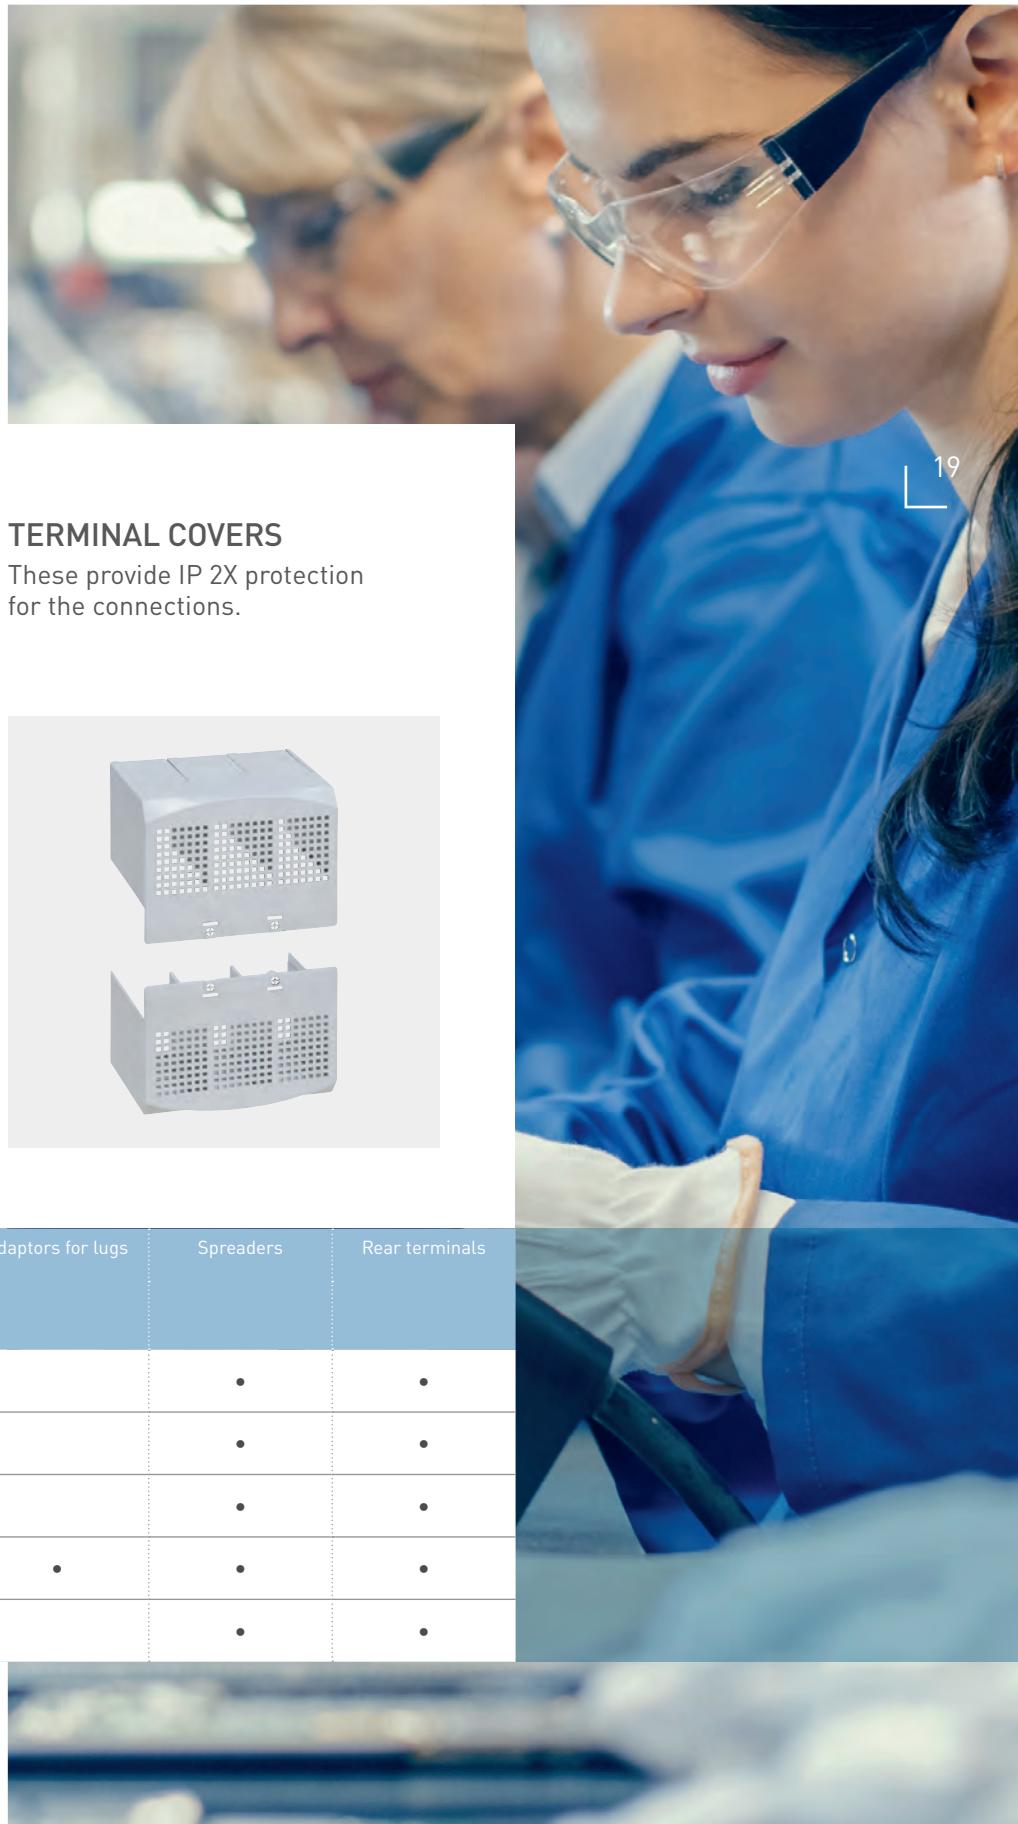

SPREADERS

These can be used for connection with large cross-section cables.

Plug-in or draw-out versions for perfect continuity of service

20

Plug-in and draw-out versions can be used to replace a faulty device in just a few minutes without cutting off the power to the other circuits. They are available for DPX³ 250 HP and DPX³ 630 and 1600 circuit breakers.

Bases for plug-in and draw-out draw-out devices offer the same connection options as fixed circuit breakers.

SAFETY,
SIMPLICITY
AND SPEED OF
INSTALLATION

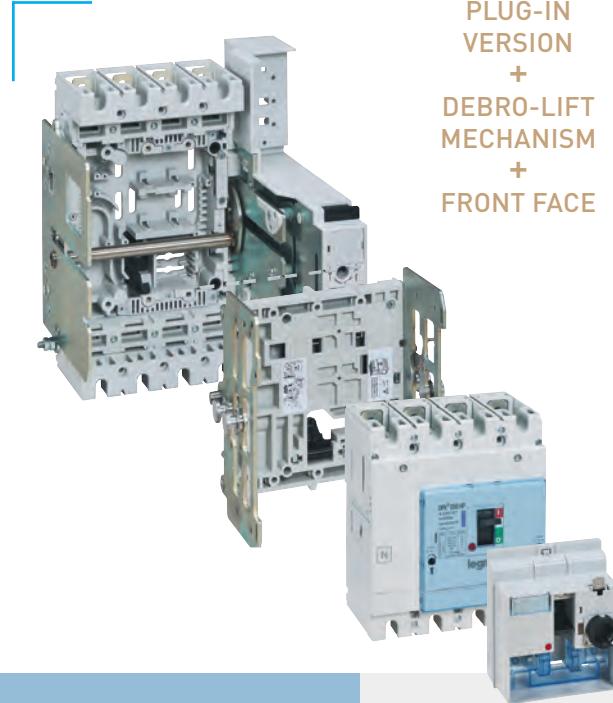

PLUG-IN VERSION

To transform a DPX³ 250 HP fixed version to a plug-in version, you simply need to equip it with a mobile kit (fixed to the back of the device) and a base for a plug-in version (which is installed in the board).

DRAW-OUT VERSION

A draw-out version of the DPX³ 250 HP is obtained from a plug-in version equipped with a Debro-lift mechanism and a dedicated front face.

LOCKING

The locking accessory **1** is used to lock the circuit breaker in the “drawn-out” position during maintenance operations. It can be fitted with different models of key barrel. Also available as a padlockable version **2**.

XL PRO³ software makes configuring your enclosures simplicity itself

22

XL PRO³ covers the entire Legrand power offer, including the new DPX³ HPs.

More than ever, this software is a must-have when designing your distribution boards:

- guide to choosing products and accessories
- view of the enclosure and component layout
- automatic creation of the costing and ordering file
