

CAT. N° 4 463 72

PLASTIC COVER + POWER CABLE FOR LED LIGHTING FOR LCS³ ENCLOSURES - 10 CM WITH MALE-FEMALE CONNECTOR

Pack (number of units)	1
Volume (dm ³)	1,026
Weight (g)	373,00

Product characteristics

LED lighting and accessories

- LED tubes with high lighting intensity allowing the lighting of an aisle containment system and providing improved visibility, particularly when black racks are used
- Tubes with rotation capability: allow the lighting to be targeted specifically at particular pieces of equipment
- Easy-to-install, highly flexible once assembled
- Can be:
 - easily extended using extension cords
 - fitted with motion sensors so that the light turns off if no motion is detected for a period of time
- Extender cord for connecting two LED lights
- Cover + connection cable (10 cm), male/female connector

General characteristics

Legrand cabling system LCS³ enclosures - aisle containment
