Description

The BTICINO lightning arrester is a device that prevents damaging equipment due to lightning. It is also equipped with overload and short circuit protection. Suitable for domestic and small tertiary installation.

Product characteristics

- T2
- 20KA
- 1P+N ND +SD

Recommendation / Restriction

- "To provide correct protection, a lightning arrester is recommended:- at the origin of each installation (mandatory depending on the type and location of the installation to be protected,- at the origin of divisional switchboards: secondary protection or fine protection of sensitive equipment,- on all outputs of external electrical circuits (supply to secondary buildings, external lighting or external electrical panels, etc.). A communication network arrester should always be installed to protect communication equipment in the presence of a lightning arrester on the low-voltage network."
