

Product sheet

MY HOME UP BTICINO

Basic probe flush-mounted version, to be mounted in electrical junction boxes.

REF. BT-3454 | EAN. 8005543628782

> [Visit e-catalogue](#)

Product characteristics

- 2 modules
- This device has 3 input terminals : - SCS : it is used for connection to the SCS bus. - PROBE : it is used for connection to the external temperature sensor. - REMOTE : it is used for connection to a remote contact, useful for different applications (e.g. to change the operating mode when a window is opened, to change the operating function...).
- To be associated to the temperature sensor item 3457 and Vantage probe item 8051
- The associated 3457 must be mounted in the wall at a height of 1.5m from the floor level, exposed to air.
- No other sensors (except 3457 and 8051) can be connected to this probe, because the correct temperature reading can't be guaranteed.

The product's benefits

Installation

- The probe has one mechanical pushbutton, which is used only during device configuration.

Usage

- The probe has 2 LEDs, one red and one green, used to point out information about device correct configuration and installation, as well as thermoregulation zone state.
