

CAT. N° 4 460 72

CABLE BRIDGE FOR LCS³ ENCLOSURES - HEIGHT 120 MM , WIDTH 150 MM AND USABLE LENGTH FROM 990 TO 1750 MM

Pack (number of units)	5
Volume (dm ³)	95,04
Weight (g)	57 500,00

Product characteristics

Cable bridge

- For crossing a hot or cold aisle containment system
- Suitable for wide or narrow cable ducts
- Sliding system: the distance between the cable ducts can be bridged at any spot without any sawing being necessary
- Cable ducts can be installed at various distances along the depth of the aisle (for example to save on the number of branches in the main supply or for intra-connectivity within the aisle containment)
- Several bridges can be used depending on the capacity required, or to keep various cables separated
- Height: 120 mm
- Width: 150 mm
- Usable length: 990 to 1750 mm
- Supplied with assembly materials

General characteristics

Legrand cabling system LCS³ enclosures - cable bridge and connecting set

- Material: steel
- Finishing: powder coating
- Colour: RAL 9011 (black)
