

NOVO GO^{!!!}

The Next Generation of Technology Enabled Care

NOVO Go⁺

Limitless reliability for more freedom of movement

NOVO Go is a new, innovative, mobile telecare solution that encourages independent mobility outside the home, whilst maintaining a professional support and response service.

Innovative technology
meets excellent design

The freedom
to feel safe,
always and
everywhere

A new dimension of Technology Enabled Care

Guaranteed peace of mind

Designed with the user in mind and compliant with all relevant standards.

Maximum compatibility

Fully integrated within the Legrand Care ecosystem and compatible with a full range of digital telecare devices.

Total flexibility

Can be used in a variety of different configurations to ensure that the user is kept safe and independent, both inside and outside the home.

Designed for ease of use

Modern and discrete design with a simple user interface and ultra-comfortable to wear.

As flexible as life

NOVO Go is designed to give independence and confidence both inside and outside of the users home, providing peace of mind every step of the way.

It supports two-way audio communication and has an easy to press alarm button. Once activated, the device can immediately notify a responder and provide precise location details of the individual requesting assistance.

NOVO Go has been designed to be discreet, and is worn comfortably around the neck, or on the wrist, and seamlessly integrates into the active life of the user, it's a portable emergency call solution that provides true freedom and flexibility for everyday life.

Handy,
adaptable
and smart

Maximum comfort on the go

NOVO Go can be precisely located anytime and anywhere - via GPS or Assisted GPS. At the touch of a button, it establishes a voice connection, guaranteeing secure communication with the home emergency call center or relatives.

NOVO Go can be monitored and easily managed at any time via PULSE CMP. In addition NOVO Go can be called from any telephone.

More freedom with security

Total flexibility

NOVO Go can be used as stand-alone mobile device, a Home Hub or in combination with a fixed Home Hub.

All-out safety

Mobile supervision and online monitoring through PULSE CMP.

Easy to use

At the push of a button, NOVO Go can immediately notify a responder and provide precise location details.

Self-installation

Designed for ease of use NOVO Go is a Plug & Play device that offers fully integrated audio communication.

Versatile combinations at home

Smart, programmable and safe

Home- / Away- Automatic

Automatic Home / Away function via NOVO Go DOCK or NOVO.

Intelligent Power saving function

Automatic Activation of Power saving functions.

Programmable Location update

Programmable interval for automatic position updates, as required.

Status information to PULSE CMP

Status updates and evaluation of events in PULSE CMP.

NOVO Go Dock

A powerful loudspeaker with smart docking station

Whilst at home the mobile device can be placed into its docking station, creating a traditional home hub infrastructure where the user can also connect additional wellbeing devices to it. Should they wish to leave the home, they simply take the mobile device from the docking station and return it once they've safely arrived back home.

-  Integrated loudspeaker and charging function.
-  6 different announcements can be set.
-  Additional emergency call and day button.
-  Search function: Find my NOVO Go with DOCK.
-  Additional emergency battery in DOCK.

The flexible solution for true peace of mind at home

NOVO Go with Fixed Home Hub is the most powerful and complete Technology Enabled Care solution where a fixed home hub is permanently required in the home. NOVO Go can be used as a traditional pendant device that can activate the fixed hub.

When indoors, NOVO Go knows it's at home and preserves its battery life by only sending radio communication to the hub. If the user ventures outside, the device knows it's away from home and turns on its mobile connectivity to function as a stand-alone unit.

-  Extends battery lifetime up to several months.
-  Fixed home hub extends home security.
-  NOVO Go and the Fix Home Hub can always work independently too.
-  Ideal for couples: NOVO Go and the Fix Home Hub can always work independently too.

Security always and everywhere

In an emergency, NOVO Go establishes a voice connection to the call monitoring centre via the built-in mobile phone which transmits quickly and precisely.

NOVO Go at home

Ready to interact with NOVO Go DOCK, NOVO, REACH IP and a range of other Legrand Care wireless TEC's devices.

Geofencing

NOVO Go can be located through high-precision GPS and A-GPS tracking. Individual geo-zones can also be configured via our PULSE CMP.

Automatic Home/ Away

The Home/Away automatically detects when the user comes home or leaves the house.

All Networks

The integrated 2G/3G/4G module supports all networks and providers for reliable communication between NOVO Go and the call monitoring centre.

Always connected

PULSE CMP allows convenient remote management and configuration of all devices.

Everything
from one
source

Always accessible

From day one, our NOVO Go clients benefit from all of the present and future device management functionalities of our PULSE CMP. In this way, they can monitor, program and manage all NOVO Go devices remotely and in real time.

PULSE CMP combines the Fixed Home Hub and mobile telecare devices under one roof with common administration and configuration of all Legrand Care devices. Due to the continued development and the creation of new interfaces, the integration of exciting new products is always possible.

- ✓ Real time monitoring and status display.
- ✓ NOVO Go remote programming.
- ✓ Request a new position via PULSE CMP.
- ✓ Detailed history of alarm and events.
- ✓ Remote function updates for both NOVO Go and DOCK.
- ✓ Mapping and geo-fencing capabilities.
- ✓ Telephone and online support, familiarity and a stronger focus on core tasks.

Always connected, updated, safe

The ability to manage all your devices remotely

Everything from one source

All devices and solutions are managed on one united platform.

Valuable time saving

Less training effort, more system familiarity to save on time.

Always up to date

Operable from anywhere, thanks to innovative cloud technology.

Highly innovative

Numerous possibilities and enhanced functionalities.

Future-proof set-up

Already prepared today for future technologies and requirements.

More time for care

Stronger focus on core care tasks and advisory services.

To support people to live their healthiest and most fulfilling lives in the place of their choice.

Legrand Care specialises in the innovative development of connected technology for the health, housing and social care sectors.

With our knowledge and experience, we are strong leaders in the international market of connected care, offering comprehensive, and fully managed digital solutions that allow customers to efficiently deploy improved care services.
