Benefits

HOW DOES THIS SOLUTION STAND OUT
WHEN IT COMES TO WORKING IN AN AREA
WITHOUT AN INTERNET CONNECTION?

One of the biggest strengths is its **flexibility and offline configuration.** Even if you are in areas without connectivity, **Home + Pro** allows you to continue working without interruptions in an easy and intuitive way. Ideal for those seeking maximum efficiency.

Greater flexibility and offline configuration

Ability to work even in areas without connectivity (e.g. on-site)
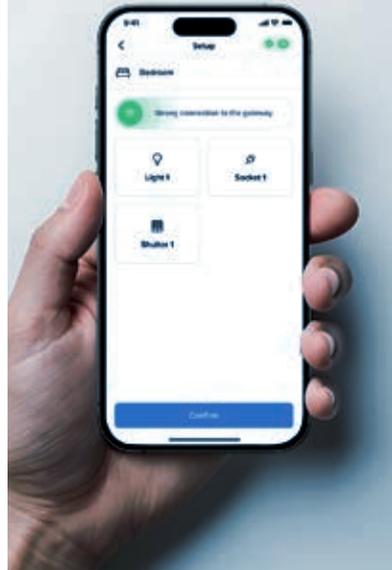

Easy to use, Ready to move in

Quick and hassle-free configuration

Intuitive interface

Your work habits do not change and the quality and experience of on-site configuration significantly improve

Time saving

Reduced installation times wherever you are, ensuring maximum efficiency and an unparalleled customer experience

Compatibility with Zigbee "With Netatmo" products ecosytem and consistency with Home + Control app

Guaranteed integration for comprehensive and coordinated management of systems
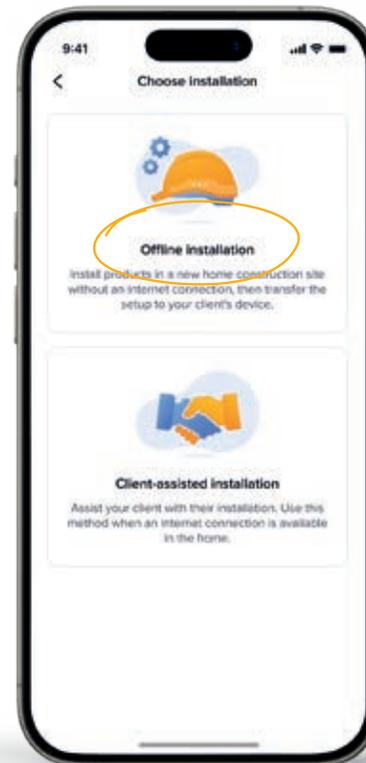

Offline installation

DOWNLOAD HOME + PRO AND LOGIN TO IT.
YOU CAN DOWNLOAD THE GATEWAY FIRMWARE (WHICH IS NOT MANDATORY) OR PROCEED DIRECTLY TO INSTALLATION:

1 Choose the type of installation

2 Direct connection to gateway
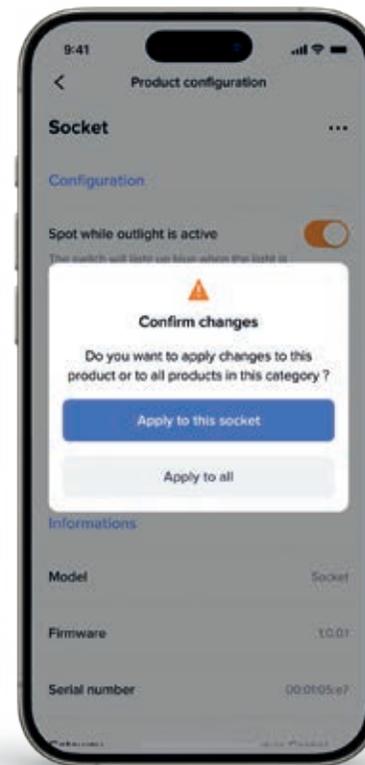

3 **Automatic product research & rooms customization**

4 **Products placement in the rooms**

5 **Products configuration**

6 **Validate the configuration**

It will be stored in the Gateway: your customer will be able to retrieve it easily in Home + Control.

Home + Control

The **Home +** ecosystem is enhanced with Home + Pro

Home + Project

Home + Control

Home + Security

Home + Pro

Home + Pro

for the configuration of Zigbee "with Netatmo" Smart Home systems.
It offers a supplementary configuration option compared to Home + Control.
Furthermore, the configuration created with **Home + Pro** can be easily transferred to the end customer via Home + Control.
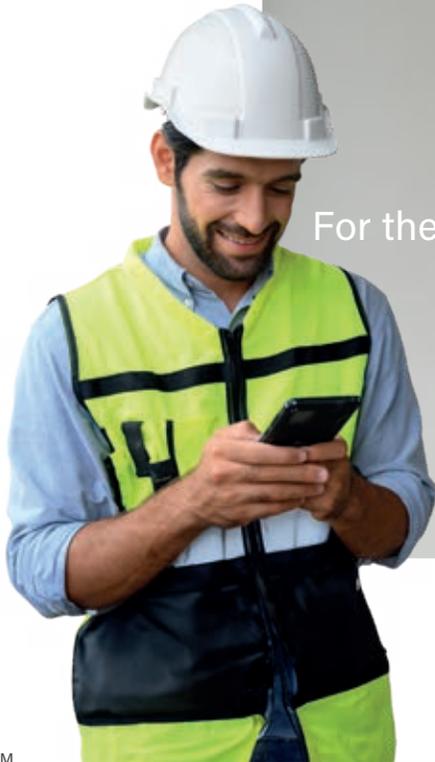

For the installer

TO EACH HIS OWN APP.
TO MANAGE EVERYTHING IN THE BEST WAY.

+ Home + Project

for the configuration of MyHome system (BUS SCS technology).

For the installer

⌂ Home + Control

for home comfort functions management. You can create and configure a smart system. The **end user** can control and manage lights, shutters, heating, appliances, and high-energy consuption devices directly from his smartphone.

For the installer and customer

🛡 Home + Security

for video door entry and security functions management. You can add cameras, doorlocks, security and safety sensors. The **end user** can control the video cameras, check who rings the bell and receive notification in case of intrusion directly from his smartphone.
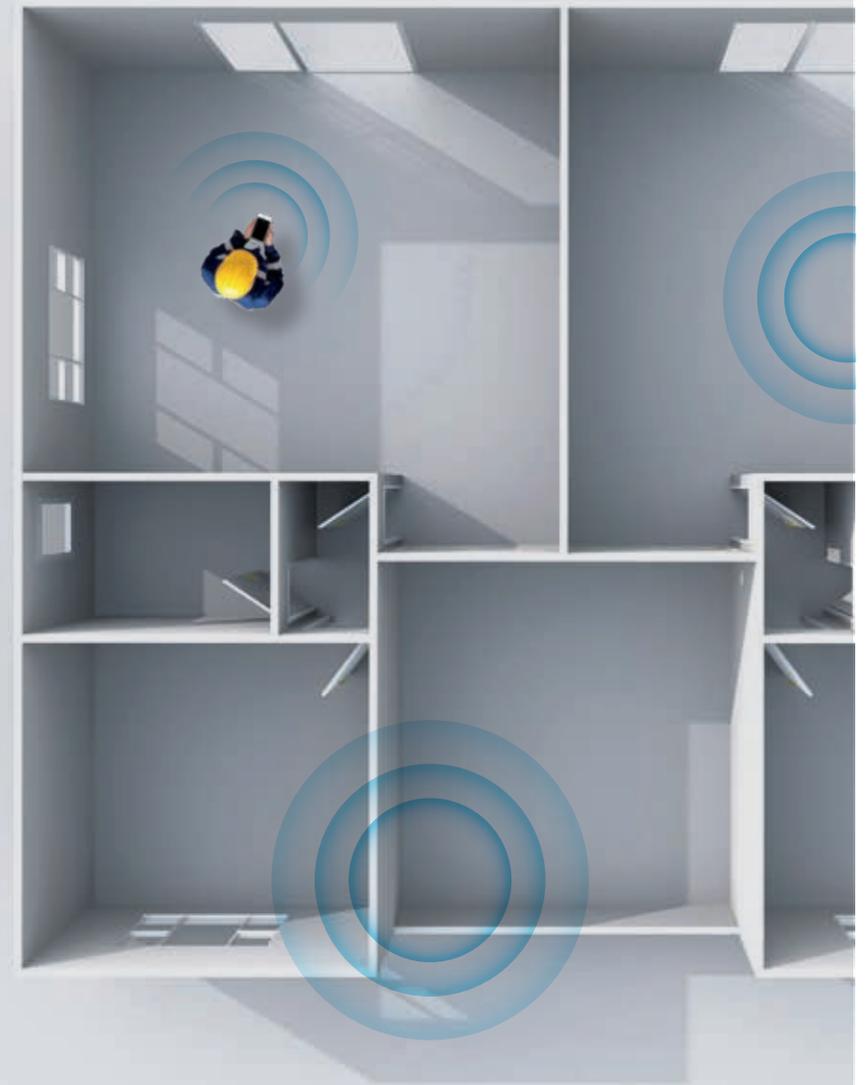

For the installer and customer

Setup of the Zigbee "with Netatmo" smart home system: **which application do you need to use?**
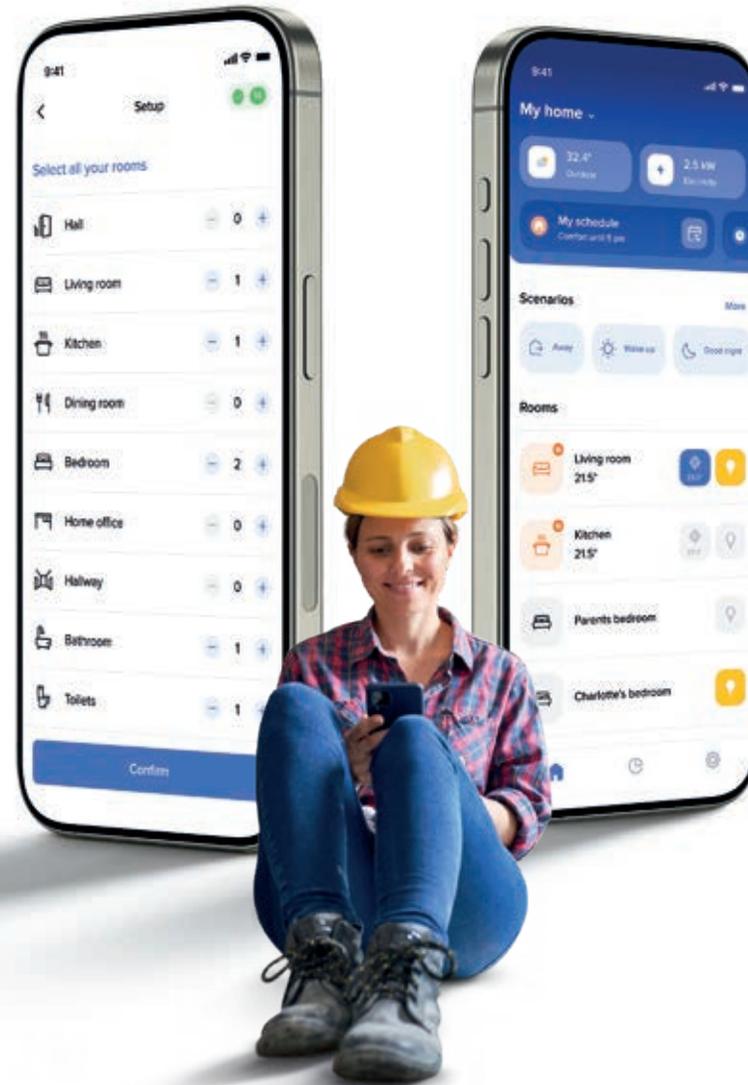

Home + Control

Home + Pro

CHOOSE **HOME + PRO** WHEN:

there is no internet connection on-site and you wish to gain productivity.

CHOOSE **HOME + CONTROL** WHEN:

there is an internet connection on-site and you wish to assist your customer with the configuration.

Home + Pro

Home + Control

Two technologies.
Two different applications.

Home + Project

Home + Pro

- For the configuration of **MyHome home automation systems** (bus-scs technology)
- It works with the following **webservers**:

Classe 300EOS with Netatmo

Server for DIN panels item F460

- For the configuration of **«with Netatmo» smart home systems** (Zigbee technology)
- It works with the **new "with Netatmo" Zigbee smart gateways** (ref. LG-xxxxB):

All Flush   In panel   Mobile

Note: Please refer to the online catalog for a list of all item codes.
